

## Product sheet – Chrysal Transport Stickers

### General

- Post-harvest product for use with cut flowers during the transport phase.
- Ready to use product supplied as adhesive stickers.

### Effects

- Helps maintain flower quality during the transport phase.
- The stickers slowly release sulphur dioxide once exposed to humidity exceeding 60%.

### Applications

- Should be used in a closed box.
- For use by growers, bouquet makers and transporters.

### Benefits

- Quick and easy to use.
- Adhesive sticker to attach to the inside of flower boxes.
- Reduces flower waste and prolongs vase life.
- Extends the distribution and sales period.
- Made of recyclable LDPE.
- Small, yet effective. Measures only 2.5 x 5.0 cm (1 x 2 inches).
- Supplied with a resealable protective storage bag.
- Easily adjustable dosing depending on size of flower box.

### Recommendations

- For best results follow the recommendations in the table below:

Box size	Recommended number of Chrysal Transport Stickers
Full	4
Half (Tabaco)	2
Quarter (Cuarto)	1

- Stickers can be placed on top of, beneath, or on the side of the inside of a box. Note: If a bag is being used in the box around the flowers (e.g. Chrysal FreshLiner), the stickers must be placed inside the bag.
- After application, immediately close the box. The box should remain closed during storage and shipping.
- After use, return the roll to the plastic storage bag and reseal. Store in a cool, dry, well-ventilated place away from heat and flame.
- By following the use instructions carefully, Chrysal Transport Stickers can be used without any harmful effects on flowers or users of the product.
